

b1

1. (Once amended) A seat belt with a printed face for a vehicle, in which a printed face of a character, a mark and a pattern is formed on one face of the seat belt formed a band shape woven with polyester at a location selected to be grasped by a user when fastening the seat belt, the printed face being embossed to prevent slippage from the user's grip and to facilitate the putting on and taking off of the seat belt.

b2

10. (New) A seat belt comprising:  
a band of woven polyester; and  
printed means for preventing slippage from the user's grip and to facilitate the putting on and taking off of the seat belt provided at location on the band selected to be grasped by a user when fastening the seat belt.
